Forecast for Monday 21 Jun 2021

Weather: The chance of some isolated clear spells in the early hours, bringing the risk of mist to summits. Largely remaining cloudy across the park though the day. Predominantly staying dry; however, a band of rain lingers to the southwest of the region, with the low possibility of this reaching the far southwest of the park around midday. Then remaining overcast into the night with cloud bases lowering towards midnight.

Chance of cloud free mountain/hill tops above 600m: 70% through the day, falling to 40% from 22:00.

Visibility: Poor visibility in any early morning mist on the summits. Otherwise, very good visibility during the day with cloud bases widely above the summits. Conditions worsening from 22:00 where cloud bases lower to 500-600m

Meteorologist's View

Although it will feel grey with the predominantly overcast skies, it will still be a relatively well-mannered day for walking.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sun 20 Jun 2021	10.2mm	10.2mm	10.2mm

Forecast for Tuesday 22 Jun 2021

Weather: Cloud clearing through the first few hours of the day. A clear and sunny day follows with long intervals of strong sunlight. Some fair-weather cloud will develop over the course of the afternoon and it will stay fine into the evening and night.

Maximum wind: Wind on the summits initially northeasterly 20 mph, transitioning to a northwesterly 10 mph through the afternoon.

Chance of cloud free mountain/hill tops above 600m: 60% in the early hours, rising to 100% for the rest of the day.

Visibility: Moderate visibility to begin owing to the clearing patches of cloud with bases of 600-800m. Becoming very good after the cloud has lifted.

Temperature: **Valleys:** Plus 10 Celsius, rising to plus 18 Celsius.
At 600m: Plus 5 Celsius, rising to plus 11 Celsius.
Freezing level: Above summits all day.
